

Customers love Ultimate Software's one-stop shop HR capabilities

HR consolidation is one of UltiPro's leading benefits. In the last year, **65% of reviewers cited HR consolidation as a key business outcome** they hope to achieve with UltiPro.

Consolidating HR management can be tricky at scale. UltiPro scores 8.7 out of 10 for its HR management features, and **9.1 out of 10 for scalability.**

Users explain how UltiPro helps them unify HR data, enable employee self-service, and integrate different HR functions:

"We have received a robust system for the same amount of money that we were spending on a system that only perform payroll. In doing so we had HUGE time savings (roughly 30 hours a week) of functions that are now automated and under one solution. Having everything in one solution means no more auditing of multiple systems."

— **Danielle Peppard**, Manager, Payroll, Benefits, HRIS & Equity Administrator, SeaSpine

"We have saved countless hours with UltiPro and being able to make manual processes electronic. It is easier having all data in one location. Instead of having employee data in many locations, we have it all in one place."

— **Megan Marvin**
Associate Benefits and Payroll Administrator,
The National Mutual Insurance Company

"If you are looking for a system that touches all areas of the Employee Life Cycle without bolting on additional products, UltiPro is a great choice. It is very user-friendly and always being enhanced and developed to stay current with technology."

— **Karen Livermore**
VP/HRIS Manager
First Commonwealth Bank
